Dear Jim,

3/4/82

I read the Permindex article in the modestly titled Executive Intelligence Review, despite the rebellion in the mind and turning in the stomach, until I came to where it says that $200,000 in black market funds "were passed into New Orleans station chief of the FBI's Division Five, Guy Banister. ..."

This is worse than crap. It is not possible to tell where fact lets off and opinion begins and they rival each other in their total worthlessness.

Almost all the fact isn't factual and the average reader will have no way of knowing it.

These LaRouche people are bad people. If it is their files to which Bud had access, he would have done better to twiddle his thumbs with that time. That, at least, would not have misinformed him.

Best,
